LATHAM & CLARK, auctioneers and real estate brokers, will sell on Monday, April 1, at 3 o'clock, p.m., valuable improved lot on G street, between Twentieth and Twenty-first streets, on the north side.

AMUSEMENTS.

Coming.

Adam Forsberg's "Grandmama's museum," after a six weeks' absence, will exhibit in Washington for one week, beginning Monday, April 1. On that day, for the first time in the history of American assessments, Mr. Forsberg will erect four mammoth pavilions, being the largest ever erected for a single admission. This is unquestionably the largest exhibition in the world, and we are confident that Washington will turn out in masses to receive it.

"Doll."

The second representation of "Doll," last evening, brought out a character that appeared to be deeply interested in the play, and made great general satisfaction. Most of the characters have fallen into good hands and are rendered in a most acceptable manner, while the portraiture of the author and his wife is well done, as is also every stock in all companies, and this theatre ought to have a share, in fact, more than one theatre ought to have, in the art of acting in its stocks. We would suggest that out of consideration to the expense of production of the audience should be stopped, as it frequently mars the show, and causes the audience to go to the expense. Manager Swift will have nothing but preserving order in his sky parlor. "Doll" will be repeated.

The Yellowstone.

Last evening a small and quiet company assembled at the elegant rooms of the Republican Association of the Pacific States and Territories, No. 120½ Pennsylvania Avenue, with an exhibition of upwards of fifty illuminated photographs of the grandeur, magnificence, valleys, rivers, lakes, etc., emblazoned in the Yellowstone. Many of the views were surpassing. The exhibition was conducted under the superintendence of Prof. Peck, who is in charge of the geological exploration of the Yellowstone, and under the direction of the Inter-

national Committee. The exhibition consisted of upwards of twenty-five illuminated photographs of the grandeur, magnificence, valleys, rivers, lakes, etc., emblazoned in the Yellowstone.

The scenes were surpassing, and the vocal music was fine. A quiet, peaceful evening can be spent there.

CITY SMALL TALK.

The equinoctial is upon us. Yesterday was breezy but pleasant. Our young ones have begun egg-picking.

Are the Grand Army lectures over?

The season for thin drabs and thin clothing is at an end.

Today will have just twelve hours of daylight and twelve hours of darkness.

One of the recent changes in the weather.

Two new cases of smallpox were reported by the Board of Health yesterday.

A recruit in a city uniform is said to be a relative of Jeff Davis. He has our sympathy in him.

"Igor."

No; as a horseman, Admiral Goldborough is not a success. It might, however, buy your mother.

It is now nearly next to impossible for us to return to the Presidential convention without getting to—Philadelphia.

A man in a suit of clothes was to be seen on the Avenue yesterday, but it will take a few more sunny days to make it gay with handkerchiefs.

Somewhere says the handsome letter-carrier on the force is who distributes from F street to the canal and from Seventh to Tenth street.

We saw one of the syndicates there is so much about when on the Avenue yesterday. He has a very nice home, but he is doing his best here in the way of laundry-walkers.

The happy man in town is Matt Laughlin, who recovered from his fall in the snow, and will bring back to those of the Yellowstone memories of the home of their childhood. The chairman of the entertainment committee chose him as the best man for the honor.

The ship of Barney is laughable, and the vocal music was fine. A quiet, peaceful evening can be spent there.

Executive Masons.

Wardrobe.

SIR: The President directs me to say that he will review the processions of Irish societies at the St. Patrick's Day celebration.

Am. Soc., your obedient servant,

HORACE PORTER, Secretary.

U.S. Consul, Liverpool, England.

RESCRIPTION REVIVED.

The regular meeting of the Board of Health had been adjourned.

Mr. Marbury, from the committee on Finance, presented a number of illuminating bills, and the Board approved them.

Dr. H. H. Brooks, entomologist, and Dr. G. O. Grant, his personal representative, reported the results of their work on the pestiferous insects of the District.
